

**EPIC**<sup>®</sup>  
TRAVELGEAR

**20**  
2004-2024  
YEARS  
OF TRAVEL INNOVATION

# Welcome to the world of EPIC®

## Innovation

The spark of innovation comes from passion to be the better and more fun choice for the travelers around the world. There are many ways to carry your stuff and that's where we come in. We are different; we bring colors, joy and passion to our users. We believe that keen observation combined with constructively used brainpower makes the difference between the fantastic and the mediocre. We believe that innovating high quality and long-lasting products is a choice that will help us to preserve and be able to enjoy our environment on a long-term basis. We put all our personal collective experience in traveling around the world, as well as the same from our friends and partners, into producing the very best we can right here and now. We do it all with a Scandinavian twist on design and functionality, and a quality determined to withstand the harsh conditions of the far north.

## Sustainability

We want to create sustainable products to protect our planet. We believe in as little additives as possible or to find new and better alternatives to polymers such as bio materials. We always try to reduce as much plastics and metals as possible when we develop new products. We develop high quality, standardized components which serves for a long service life. We believe that this way is the best for both our users and the environment.

## Designed In Sweden

We started our journey in 2004 on the west coast of Sweden just outside of Gothenburg. With a true believe that it must be a better, more sustainable and more fun choice among bags and luggage we started EPIC Travelgear. Our mission was then, and still is, to make epic travelgear for epic adventures.

# Our warranties - our top priority

A really good warranty offers security and a good gut feeling when buying a product. Especially if the product will be exposed to tough conditions and will last for many years to come. It is of the utmost importance that you feel calm, safe and secure when purchasing all EPIC products. Our wish is that you buy a suitcase that satisfies your needs now and in the future.

Below you can read about the various guarantees we offer for our products. If you decide on a product that has the "EPIC Full Armor Warranty" (5 or 7 year warranty), we can assure you that you get a really good warranty for your suitcase.

**EPIC® 7 YEAR FULL ARMOR™ WARRANTY**

Products with this warranty are covered for a period of 7 years against defects in materials and workmanship from the date of original purchase. If the shell of your case should break for any reason, even due to third party (such as airlines) handling, we will replace the case at no charge, anywhere in the world.

**EPIC® 5 YEAR FULL ARMOR™ WARRANTY**

Products with this warranty are covered for a period of 5 years against defects in materials and workmanship from the date of original purchase. If the shell of your case should break for any reason, even due to third party (such as airlines) handling, we will replace the case at no charge, anywhere in the world.

**EPIC® 5 YEAR LIMITED WARRANTY**

Products with this warranty are covered for a period of 5 years against defects in materials and workmanship from the date of original purchase.

**EPIC® 3 YEAR LIMITED WARRANTY**

Products with this warranty are covered for a period of 3 years against defects in materials and workmanship from the date of original purchase.

**W**e want to create sustainable products to protect our planet. We believe that one way of doing this is to create high quality products with long service life. We only choose tested and high quality materials. A suitcase may be the product that will suffer the worst kind of bad treatment during its life cycle. It's heavy loaded and thrown around airports, so we must do everything we can to ensure the quality in order to reduce the amount of crashed luggage that ends its life in a dump.

## Easy Repairs

It should also be easy for the user to replace components if they are worn out, we shall always supply spare parts to such large extent as possible. An example of an initiative for smoother exchange of wheels is our patented EPIC Standard system. We have a full range of exchangeable wheels.

## Better Materials

We always comply with current EU legislation (ECHA) and apply the REACH Regulation to all materials from our suppliers. We believe in as little additives as possible in the materials and in those cases where the material requires chemical addition to achieve at it's maximum, it should be kept well below the limit values.

# Protect our Planet

# Our promise - nobody should get hurt

It is extremely important that we have good relationships with our manufacturers, and that they meet the requirements for good work environment, health and safety.

## Our Code Of Conduct

All of the factories we work with are undergoing continuous reviews in accordance with our Code of Conduct, which is compatible with BSCI. The code also places requirements on the supply chain for the prohibition of child labor, forced labor and discrimination, health and safety, right to freedom of association and collective agreements, salaries, compensation and other benefits, basic environmental and management systems.

## Our Community

In addition to having good insight, we are actively working and are members of Amfori, which is the leading system of Business Social Compliance Initiative (BSCI). Amfori is an industry-wide platform that supports companies to push social agreements and improvements in the global supply chain of manufacturers. BSCI applies the international principles of international labor standards that protect workers' rights, e.g International Labor Organization (ILO) Conventions and Declarations, UN Guidelines for Business and Human Rights and Guidelines for Multinational Enterprises in the Organization for Economic Cooperation and Development (OECD).

# EPIC® protection technologies

## SUPERLIGHT DONE RIGHT

One of the secrets behind the quality and appearance of our products is our own developed technologies. Ever since the start in 2004, the product development team has worked to come up with the best recipes in polymers. EPIC has never been satisfied with factory standard, in order to offer the quality and the long warranty periods we offer for the shells, you have to constantly modify and develop to meet increasingly tougher requirements.

But, it is not just the quality that is important, you can make a steel suitcase that can withstand anything but is completely impractical as a suitcase. It is the combination of lightness and strength that is difficult to combine, but with our proprietary materials that we present here, we do just that: Superlight done Right!

## VTT™

VTT stands for Variable Thickness Technology and is our unibody polypropylene material and manufacturing process, basically meaning that we manufacture these shells with high precision in variable thickness to optimize strength while making it as light as possible. We really love polypropylene for its strength rich details that we can create with it.

## EXOSPHERE™

ExoSphere is a unique shell technology from EPIC. Made from 100% newly produced polycarbonate raw material which has proven to be one of the best materials for suitcases. The outer layer is a matte, silky finish that is extremely scratch and abrasion resistant while the dual-layer design reduces weight and material usage, together creating a reinforcing shield.

## DURALITE+™

For our DuraLITE+ material, we use at least two layers of the very best pure polycarbonate material on the market, along with an extra outer film of polycarbonate that increases its strength and impact resistance. Depending on the product, the outer surface varies, e.g. for printed bags we use a high-contrast film that makes colors and prints pop more than was possible before.

## PURETECH™

The material consists of a composite of pure ABS in two layers. The special pureTECH luster in the outer film allows us to create the most beautiful colors for every season, while the unique composition in manufacturing makes the shell tougher, stronger and more scratch resistant.

## AIRFRAME™

We have always been doing great soft sided cases. After years of development we found one thing that unites our soft sided cases - Superlight Done Right! We believe that, besides being lightweight, a soft sided case must be rigid and strong, so we developed the airFRAME chassis. It's equipped with a light-weight core manufactured from a specially formed and cut polypropylene sheet coupled with polycarbonate rods for extra strength.

# EPIC® Functions

## WATER RESISTANT ZIPSEAL

EPIC's patented zipper solution. The rubber-covered, waterproof, zipper is recessed in the shell, which makes it extra protected against scraping and impact. The solution also means less material and greater precision in the manufacturing process, easier and more efficient.

## WATER RESISTANT ZIPPER

This product is equipped with a high quality, rubberized, water resistant zipper. You can't go diving with it and still keep dry, but this zipper not only looks great, it provides excellent additional protection from the wet and rainy weather that we all sometimes travel in.

## REFRESH™ INTERIOR

Re:FRESH is the revolutionary, new, and fully-removable and exchangeable interior from EPIC®. With the Re:FRESH™ interior, you can remove your interior lining in order to wash and freeze it (in order to eliminate the possibility of any unwanted tiny critters moving in with you after your journey), or mix and match colors and/or patterns on the inside of your case to customize. Some of our Re:FRESH™-equipped cases are actually delivered with two interior lining kits – one classic, and one crazy. Fresh tidiness and peace of mind have probably never been more fun!

## CAVE™

Cave may be the cleverest pocket you'll ever see. From the spacious outside pocket you can reach into a special built-in bag inside the case. Fill up the bag and it expands inside the case, or leave it empty, and it will hardly take up any space at all.

## BUTTERFLY INTERIOR™

The interior consists of double dividers, one in the bottom and one in the lid. Perfect when you really want to separate your pack into two parts. Neat and tidy!

## RIPSTOP POLYESTER

The outer shell material of this product uses a lightweight, water resistant and extremely durable ripstop polyester. Ripstop materials use interwoven ripstop reinforcement threads in a crosshatch pattern with a coarse, strong warp and filling yarns at intervals so that tears will not spread.

## DIAMOND SURFACE™

This trolley utilizes our Diamond Surface outer layer, which makes the shell tougher, stronger, and more scratch resistant. Lots of people love the metallic luster it adds as well!

## REVERSED DIAMOND SURFACE™

This trolley utilizes our Reversed Diamond Surface outer layer, which makes the shell tougher, stronger, and more scratch resistant. The Reversed Diamond surface also adds a silky matte finish that gives the colors extra life and shine.

## SOFT-SHELL 500D

The outer material uses a durable, heat-treated, and specially padded, water-resistant 500D Polyester fabric.

## SOFT-SHELL 600D

The outer material uses a durable and water-resistant 600D Polyester fabric.

## NYLON

The outer material uses Nylon which is a strong, extremely lightweight polyester fabric with a glossy finish.

## SPACEBOOST™

### SPACEBOOST™ EXPANDER

The SpaceBOOST expander function is a bit of magic in the shape of a zipper. Use the zipper to open and make the front of your suitcase expand or slim it down by closing the zipper again.

## FASTBACK™ / FASTLANE™

### FASTBACK™ / FASTLANE™

The FastBACK function gives you quick and easy access to your laptop through the openable front portion of the case. Its also lockable for your security. FastLANE is the equivalent of soft bags.

## GFORCE™

### G-FORCE™

Inspired by car racing we designed the G-Force interior with fantastic organizational possibilities in mind. It has a totally unique 4-point packing strap system, integrated divider, and zipped mesh pockets, all of this is done with extremely lightweight, performance materials and pockets.

## EPIC STANDARD WHEEL SYSTEM™

This trolley is equipped with our revolutionary EPIC STANDARD invention. We see the future in easy exchangeable wheels with standard fitting. This patented system make it very easy to change the wheels, either to new ones if you wear them out, or to another wheel model that fit your needs. And the best part is, as long as the suitcase model is marked with EPIC STANDARD, the wheels will fit exact, regardless of which model of suitcase it is, because of the standard wheelhouse fitting.

## AIRSPPEED® TWO WHEELS

This trolley is equipped with two high quality easy rolling wheels. All of our wheels are replaceable if worn out, and are equipped with a rugged housing that helps protect your trolley from curbside and other sources of impact.

## DUAL LOWFAT™

### AIRSPPEED® DUAL LOW-FAT™

This trolley has a recessed and offset twin wheels system that gives extra stability and up 10% more packing space. The tire is made of a soft, but durable and super quiet compound, and is supported by double, sealed cartridge bearings for added smoothness and longer life.

## SLIM™

### SLIM™

This is a further refined cabin size concept that optimizes even the width of the case and gives us the maximum allowable dimensions of 55cm height, 35cm width, and, a variable depth. This is a size format that can be used for KLM, and Air France.

## airspeed®

### EPIC AIRSPEED WHEELS™

All EPIC trolleys are equipped with Airspeed wheels, which are designed and manufactured with ergonomics, low weight, high performance, and durability as highest priorities. You can expect comfort, great performance, and a long service life. All Airspeed components can even be replaced in the event that they become damaged or you wear them out. It doesn't get much better than Airspeed!

### AIRSPPEED® SINGLETRAK™

Robust and extremely lightweight Single-TRAK wheels for easy maneuvering on all surfaces. The spoked design of the wheel itself is a nice design touch, but also helps to reduce weight while retaining strength. The fork is lightweight and resilient. The "tire" is made of a soft, but durable and superquiet compound. SingleTRAK wheels will get you there fast, smoothly, and with a minimum of weight!

### AIRSPPEED® DUALTRAK XL™

This trolley has robust, extra-large "twin" DualTRAK wheels for our best maneuverability on all surfaces. The "tire" is made of a soft, but durable and super quiet compound, and is supported by double, sealed cartridge bearings for added smoothness and longer life!

\* Also available as a separate item.

## ULTRA SLIM™

### ULTRA SLIM™

This is a format concept that we've developed in order to meet the restrictions for cabin size enforced by many airlines today, especially low cost carriers such as Ryan Air. The size format we use for SLIM is 55cm height, 20cm depth, and a width of approximately 40cm.

### TRAVEL SENTRY® APPROVED LOCK

Using this Travel Sentry® Approved lock allows your luggage to be opened, inspected and relocked by security authorities, more than over 650 airports using the system in 30 countries. When purchasing a luggage from EPIC, it's always equipped with a Travel Sentry® Approved lock that complies with regulations. You won't face the risk to have your luggage broken open by security.

### AIRSPPEED® DUALTRAK™

This trolley has robust "twin" DualTRAK wheels for our best maneuverability on all surfaces. The "tire" is made of a soft, but durable and super quiet compound, and is supported by double, sealed cartridge bearings for added smoothness and longer life!

\* Also available as a separate item.

## carpetking™

### AIRSPPEED® CARPETKING™

With our new CarpetKing wheels you can now easily roll over most any surface with less friction and better flotation than ever! The totally new design of these wheels provides unsurpassed flotation on a myriad of surfaces from yes, carpet(!), to cobblestones, grooved drainage channels.

\* Also available as a separate item.

## SLIM MAX™

### SLIM MAX™

Bigger is often better. SlimMAX gives you the maximum of cabin allowable space in almost every situation. With its SpaceBOOST™ expander closed, it maxes out at a perfect 55x40x20cm format. With its expander fully open it goes up to a 23cm depth, which is the maximum for most less restrictive carriers such as SAS. In other words, EPIC Slim- MAX™ 55 is the perfect cabin size almost anywhere you go.

Artistry And Innovation

# Anthem™

**First Class Traveling**

EPIC Anthem is combining cutting-edge features and a captivating design like never before. The striking, aesthetic design is a feast for the eyes, turning your luggage into a fashion statement. With its elegant lines and unique style, EPIC Anthem not only performs but also enhances your personal style as you travel.

**Next Generation Lightweightness**

Crafted in a uni-body high-quality, lightweight polypropylene. This lightweight yet robust material is a testament to durability, designed to withstand the rigors of travel and ensuring that your belongings remain safe and secure throughout your journeys. Through innovation, style, and durability EPIC Anthem redefine your travel experience, you can really trust in the longevity of EPIC Anthem. For the shell, we use our technology VTT to ensure an extra strong and lightweight case.

**Grows With The Task**

Packing and living on the road with Anthem is also easy with a well-equipped interior with double packing straps, divider with an extra large pocket and an easily accessible pocket in the main compartment. Anthem has the SpaceBOOST expander function on all sizes which gives you extra space when you need it.

**Epic Standard Wheels**

EPIC Anthem is equipped with our revolutionary and new invention, EPIC STANDARD. We see the future in easy exchangeable wheels with standard fitting. This patented system makes it very easy to change the wheels, either to new ones if you wear them out, or to another wheel model that fit your needs.

**The Award Winner**

# Phantom SL™

**A True Superhero**

Phantom is winning and winning. It takes all competitions with confidence, knowing that winning doesn't come by luck, you don't get more lucky the more you compete. You win by hard work and determination and Phantom does. With its uni-body VTT design, it's literally oozing with that something special, the details, the quality. Phantom has changed the way we see things in luggage.

**A Premium Experience**

All of the components are top-quality and smooth running. The wheels, and top- and side handles are made by Airspeed ensuring low weight, high performance, and long life. You can expect a long service life from these. All key components can even be replaced in the event that they become damaged or you wear them out. For the shell, we use our technology VTT. It's equipped with a waterproof zipper for extra security. The mono-tube handle give you extra space for your packing, it's also super-strong and easy to use.

**FastBACK Version**

The cabin size of the Phantom SL range comes in two versions, the UltraSLIM and FastBACK. The FastBACK function gives you quick and easy access to your laptop through the openable front portion of the case. Its also lockable for your security.

**Epic Standard Wheels**

EPIC Phantom SL is equipped with our revolutionary and new invention, EPIC STANDARD. We see the future in easy exchangeable wheels with standard fitting. This patented system makes it very easy to change the wheels, either to new ones if you wear them out, or to another wheel model that fit your needs.

**Built For The Future**

# GTO 5.0™

**Total Protection**

EPIC GTO 5.0 is designed, developed and manufactured to be extremely rigid and strong, but very lightweight and functional. The lightness and strength of EPIC GTO 5.0 is achieved through the design and structure of the case, but even through the use of extremely high-quality materials, and manufacturing in a precision environment. The GTO 5.0 shell is made in the special ExoSphere material. It's a very light and impact resistant polymer called polycarbonate. Combined with the unique surface it provides an extra strong reinforcement. All these strengthening features allow us to offer the best shell warranty we have, the 7 year Full Armor warranty, for your protection.

**High Performance Luggage**

Packing and living on the road with GTO 5.0 is also easy with a well-equipped G-Force interior inspired by the products racing roots. The SpaceBOOST expander function gives you extra space when you need it. The trolley system is extra rigid and strong for easier maneuvering, also extra long on the large size which means that you can stack your cabin luggage on top without problem. GTO 5.0 is really our signature range, it's high performance luggage by EPIC.

**Epic Standard Wheels**

EPIC GTO 5.0 is equipped with our revolutionary and new invention, EPIC STANDARD. We see the future in easy exchangeable wheels with standard fitting. This patented system makes it very easy to change the wheels, either to new ones if you wear them out, or to another wheel model that fit your needs.

Hit The World in Style

# Crate Reflex EVO™

**Exclusive Original**

Sparkle like a diamond by night. Let it touch light and it becomes beautifully bright. The unique Crate Reflex is back in a new shape and is here to celebrate you. The world is at your feet and waiting for you. Just say yes.

**Reflex EVO**

This beautiful material have all the ingredients and all properties as DuraLITE+ but it's very special. Crate Reflex EVO is equipped with a three layer composite material combining strength, flexibility, beauty, depth, and now even a reflective function provided through truly reflective elements within the film. This patented manufacturing process is developed by EPIC.

**Next Level Zipper**

Highly water-resistant zipper through its rubberized surface, and of the highest standard for smoothness in operation and durability.

**Epic Standard Wheels**

EPIC Reflex EVO is equipped with our revolutionary and new invention, EPIC STANDARD. We see the future in easy exchangeable wheels with standard fitting. This patented system makes it very easy to change the wheels, either to new ones if you wear them out, or to another wheel model that fit your needs.

**Express Your Colors**

# Crate Wildlife™

**Made To Move**

The powerfully raised and lowered portions of this case give it its unique, but recognizable look while adding a great amount of strength and stability to the shell. The shell is made from DuraLITE+, to further ensuring strength, elasticity and low weight.

**Extra Space When Needed**

For the times when you've got extra gear to stow, or would like to bring some extra items home with you from your travel adventure, we've added our great SpaceBOOST feature on M and L size, giving lots of extra space on demand.

**Limited Edition**

Every season we design different expressions of color, everybody is unique so we hope that you find your expression through one of these beautiful prints. The production is limited so grab one while it lasts.

**Epic Standard Wheels**

EPIC Crate Wildlife is equipped with our revolutionary and new invention, EPIC STANDARD. We see the future in easy exchangeable wheels with standard fitting. This patented system makes it very easy to change the wheels, either to new ones if you wear them out, or to another wheel model that fit your needs.

EARTH BOUND -76

Structural Design For The Future

# Airwave NEO™

**Premium Accessible**

We have created a new generation of the popular AIRWAVE model. The unique thing about Airwave is its structural design that provides extra protection against impacts in the shell. We have carefully selected seasonal colors which we have crowned with our Reversed Diamond Surface for extra shine and anti-scruff properties. A stable pulling system and four DualTRAK wheels guarantee a smoother travel experience. All components are consistently selected and tested and are of course replaceable, that is our philosophy of a durable product.

**That Extra Shine**

The shell is made of our own developed material PURETECH™ to further guarantee protection, on top we add our Reversed Diamond Surface which makes the shell tougher, stronger, and more scratch resistant. The Reversed Diamond surface also adds a silky matte finish that gives the colors extra life and shine.

# Explorer NXT™

## For Function Freaks

Explorer NXT™ is the next generation for functional bags and backpacks. The range is oozing of great functions and the sleek design adds a great touch to your style. Explorer NXT is a great way to pack and transport your gear with it's four grip handles and functional outer pockets. Explorer NXT is the criterium of rolling duffles, great functions and easy to pack. The Daytripper backpack has a practical top pocket for the easy access things and a cave pocket on each side for the slightly larger things.

## Hassle Free

These soft great gear for function freaks, all materials, buckles, webbings etc. is chosen and designed with the user in mind to get that hassle-free experience and to give that well-dressed look. We can promise that there is a bag for everyone in this range, it doesn't matter if you travel the world, commute to work or go to the gym, we are sure you will find your style.

## Lightweight

The range consists of lightweight wheeled trunks in four different sizes, and a great backpack all made in a fantastic rip-stop material. These products will likely impress you with its agility.

The Soft Side

# Discovery NEO™

**Standard Issue - Superlight**

EPIC Discovery NEO is our most popular soft side range. Discovery NEO is equipped with all the latest technologies that you can expect from a modern soft side case. We still use our well tested airFRAME chassis which makes Discovery NEO very stable and strong at this low weight.

**Well Equipped**

Packing and living on the road with EPIC Discovery is also easy. With a well-equipped interior, complete with divider and packing straps for packing to the max. The SpaceBOOST expander function, on all sizes, gives you the extra space when you need it. The two outer pockets are perfect to pack the easy-access things.

**Smart Wheel Design**

Another great feature is our new DualLOWFAT 4X wheel system, the recessed and offset design gives extra stability and give you up 10% more packing space. The tire is made of a soft, but durable and super quiet compound, and is supported by double, sealed cartridge bearings for added smoothness and longer life. All this packed in a modern and sleek designed case.

**EPIC® Airframe™**

We have always been doing great soft sided cases. After years of development we found one thing that unites our soft sided cases - Superlight Done Right! We believe that, besides being lightweight, a soft sided case must be rigid and strong, so we developed the airFRAME chassis. It's equipped with a light-weight core manufactured from a specially formed and cut polypropylene sheet coupled with polycarbonate rods for extra strenght.

# Dynamo 4X™

**Lighter Than Light**

EPIC Dynamo 4X is designed to reduce weight while increasing strength and function. Extremely lightweight and durable design in 600D polyester. Fully optimized UltraSLIM Cabin-trolley with a deep outer front pocket for your laptop. The size (55x40x20cm) maxi- mizes packing volume while being accepted on virtually all flights and airlines including low-cost carriers.

**Durable**

The robust chassis is reinforced at critical points to reduce the effect of third-party handling and normal wear and tear. Durable, high-quality DualTRAK wheels, traction systems and other components make traveling with the Dynamo easier and help ensure a long product life. Key components can be replaced in the event that they become damaged or you wear them out.

# Essentials™ XPAK®

## Extra Space When Needed

EPIC Essentials are the perfect bags for day trips, they provides extra space for shopping at your destination! The range consists of two different collections. The Rugged and Foldable and the Lightweight and Foldable.

## Lightweight And Foldable

This range consists of five different bags, constructed in lightweight and strong reinforced nylon, it's easy to pack, use, and carry. We can promise that there is a bag for everyone in this range, From the small hip-pack to the generous on-board size bag.

## Rugged And Foldable

A series of bags from 28 up to 132 liters. Durable and foldable in ripstop polyester. When folded, they take up no space, perfect to have at home or on the go. You often need a bag but you do not want them to take up space when not in use. Solid carrying handles and detachable shoulder strap. Choose size as needed or why not all four sizes?

ALL MODELS ARE FOLDABLE IN THEIR OWN POCKET.

# Essentials™ Proton EVO®

## Essential Bags For Every Day Use

This collection is created to offer most of what you need in a bag without adding too much, instead just the right amount. Made from a strong polyester, with high quality straps, zips and buckles. All bags have padded computer compartments.

The backpack POD is available in two sizes; Medium (laptops up to 16") and Large (laptops up to 17"). The TOTE backpack is unique with its "roll-top" expander, also with a padded laptop case for laptops up to 17".

The model Brief Transit is light and has lots of functions and smart internal storage solutions in addition to the padded computer compartment for laptops up to 16". Designed in a stable construction in good materials, created to be used a lot.

The two toilet cases, the small "COMPACT" and the large "HANGING BOX" are fully lined with internal and external compartments. The larger toilet case also has a built-in hook to easily hang it up in the bathroom.

**Medium Pod Backpack**  
 SIZE: 40H 29W 13D      WEIGHT: 1,2 KG

## 2004

We started the EPIC® journey with a true belief that there must be a better, more sustainable and more fun choice among bags and luggage.

## 2016

We launched the first true reflective luggage on the market, Crate™ Reflex.

WORLD FIRST!

## 2018

We filed the patent for EPIC Standard™, a huge step towards a more sustainable future with easier repairs and longer life cycles for luggage. Phantom™ SL was released.

WORLD FIRST!

## 2017

Together with the Swedish material innovators Trifilon, we achieved our ambition to make the first biocomposite luggage on the market with the release of Phantom BIO™. The Exosphere™ surface design was registered, and the new version of GTO™ was introduced to the market.

## 2019

Zelete™ is presented to the market introducing Zip-seal™. This innovation means less plastic around the zippers and less metal used in total. Meaning more lightweight and better for the environment.

## 2020

We released the all-new Spin™, blending Scandinavian minimalist design with maximum capacity.

## 2024

Introducing Anthem™, a new solid-body VTT product that further strengthens our design language and shows the way in design and expression for the future.

## 2023

We launched a new updated version of Explorer, the NXT edition. We follow up the tradition of always having a robust soft series in the collection.

## Commitment And Dedication

This year, 2024, EPIC Travelgear celebrates 20 years. When we started EPIC in 2004, there were no fun alternatives to the gray and black suitcase and that's what made us committed to make a difference. With color and pattern, we made the suitcase an accessory and an extension of the user's personality. With innovative shapes, we brought in a new view of shell design, structural design with expression. Ever since the start, we have a dedication to create a better alternative in all parts. We then as now develop our own material mixtures for the shells which enable us to have guarantees we stand for. Own solutions for functions such as zippers and wheels, all so that our users can clearly feel that a bag from EPIC is designed and manufactured with the user in focus. Here you can read about some of our milestones that we are particularly proud of. The journey continues.
